

G. Thomas Kingsley

Tom Kingsley is a senior researcher in housing, urban policy, and governance issues at the Urban Institute, and is the author of numerous publications in those fields. He served for 11 years as the Director of the Institute's Center for Public Finance and Housing and currently directs the National Neighborhood Indicators Partnership -- an initiative to further the development of advanced data systems for policy analysis and community building in U.S. cities. Other projects he directed over the past decade include: assessing lessons from HUD's HOPE VI program for the future of public housing; providing analytic support to the Annie E. Casey Foundation's Making Connections Initiative; and analyzing the patterns and effects of concentrated poverty in America's urban areas. In the early 1990s, Mr. Kingsley was co-director for the Ford Foundation sponsored Urban Opportunity Program, which produced four books on the status of urban policy issues in America, and assisted HUD Secretary Cisneros in developing a series of essays on the future of American cities. Before that, he directed a number of other major policy research programs, including: testing the market effects of housing allowance programs (1974-80, the HUD sponsored Housing Assistance Supply Experiment); analyzing the structure and potentials of metropolitan Cleveland's economy (1980-82, for the Cleveland Foundation); preparing a national urban development strategy for Indonesia (1982-85, for the United Nations); and helping the Czech and Slovak Republics design and implement policy reforms in housing and municipal infrastructure (1991-95, for USAID). Mr. Kingsley previously served as Director of the Rand Corporation's Housing and Urban Policy Program, and as Assistant Administrator for the New York City Housing and Development Administration. He has also taught on the faculties of the graduate urban planning programs at the University of California, Berkeley, and the University of Southern California.
